

Fig. 1

| No. | DESCRIPTION | QTY in Kit |
|-----|---------------------|------------|
| 1 | Panel Mirror | 1 |
| 2 | Mirror Pivot Stud | 2 |
| 3 | Flat Head Bolt | 2 |
| 4 | Slotted Brackets | 2 |
| 5 | Self-Tapping Screws | 4 |
| 6 | L-Mounting Brackets | 2 |
| 7 | Split Lock Washers | 2 |
| 8 | Nuts | 4 |
| 9 | Adjustment Knobs | 2 |

Installation Instructions

1. Assemble the parts to both ends of the Panel Mirror as shown in Fig.
2. Finger tightening of all the bolts and knobs will be adequate until the mirror is finally mounted.
3. The actual mounting points for the Panel Mirror must now be selected. Cars and trucks vary somewhat in construction in the area round the top of the windshield. Some have a metal strip just under the headliner fabric which can easily be felt and followed with the finger tips. Other cars do not have this feature, but have a wide metal strip running along the top of the windshield. Either type provides a suitable base on which to mount the Panel Mirror.
4. Hold the assembled mirror up to the selected mounting point. Fig. 2 shows a rough idea of where the Panel Mirror should be mounted on most cars. Your own preferences may vary, so move it around a bit until you are satisfied. Take care to ensure that the sun visor bracket does not impede the movement and adjustment of the mirror.
5. Holding the mirror with one hand, mark the holes to be drilled through the goo mounting brackets. Now drill the four holes using a 1/8" drill bit.
6. Remove the goo mounting brackets from the mirror and mount them securely to the previously drilled holes with the four self tapping metal screws provided.
7. The mirror can now be re-attached to the mounting brackets. Adjust the mirror to give you the best possible viewing, then tighten down the nuts on the mounting brackets and the knobs at each end of the Panel Mirror.
8. To re-adjust the mirror for other drivers simply loosen the knobs slightly on either end of the mirror and re-tighten after adjustment has been made.
9. To clean the mirror glasses use any proprietary window or glass cleaner. DO NOT USE any abrasive type of cleaners.
